Step 3: Click the next button.

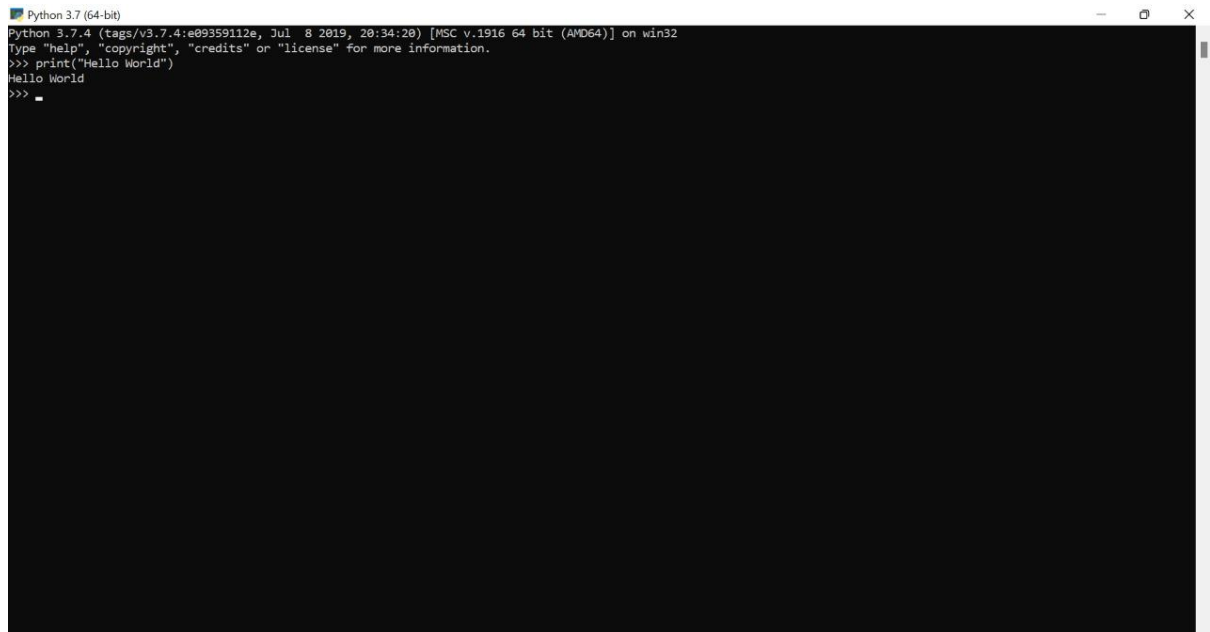

Step 4: Change the customize install location name and Click the Install button.

Step 5: Then go to the installed python website.

Step 6: Enter the program.

A screenshot of a Python 3.7 (64-bit) console window. The window title is "Python 3.7 (64-bit)". The console output shows the Python version and build information, followed by a prompt to type "help", "copyright", "credits" or "license" for more information. The user enters a multi-line program: >>> print("Hello World") followed by Hello World on the next line. The prompt >>> is shown again on the next line.

```
Python 3.7.4 (tags/v3.7.4:09359112e, Jul 8 2019, 20:34:20) [MSC v.1916 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license" for more information.
>>> print("Hello World")
Hello World
>>> _
```
